1. When we switch to the Light mode, the logo of enord and menu section in the navbar are difficult to See.

2. I find It quite irritating whenever this countdown appears everytime on the time of reloading….

3. This section I found the most crucial error as while scrolling when we find this start a project button the user got excited and I also got excited too. But when I clicked to it then it takes me to a page where only our organization address and all other details are shown.
   This will break the trust of user with the website as this will not been able to fulfil the word marked by our organization .

4. After opening the contact page,this section content got repeated on the on the same contact page and this button will navigate to the same page every time we click on it.

5. Please use paragraph tag instead of anchor tag because it is not opening anything.
